Professional Summary

Data Engineer with 6+ years of experience architecting resilient data pipelines, optimizing ETL frameworks, and integrating enterprise data across modern platforms. I bring a unique blend of deep expertise in **Snowflake, dbt, Python, and Matillion ETL** with hands-on proficiency in ServiceNow, enabling seamless data automation across cloud and workflow ecosystems. **Speaker at Snowflake Summit 2024** and a key contributor to ServiceNow's data transformation initiatives.

Work Experience

Data Engineer — ServiceNow

Mar 2024 – Present | Hyderabad, India

- Built a **Python-based integration** ingesting **10-K filings** from SEC EDGAR into **Snowflake**, enabling the **AI/ML team** to send prospects outreach tailored to each company's filings.
- Built a **ServiceNow-to-Snowflake** framework using the **Snowflake's ServiceNow Connector** and **dynamic tables** to automate data ingestion.
- Streamed data from **Confluent Kafka** to **Snowflake** via **Snowpipe Streaming** and built downstream **Streams and Tasks** pipelines, achieving **~5 s** end-to-end latency per record from Kafka to Snowflake.
- Integrated data from **10+ Apps** into **Snowflake** for unified enterprise reporting.
- Presented on **Snowflake External Access** at **Snowflake Summit 2024**, detailing secure API integration methods.
- Led the **AI Agent Studio** at **ServiceNow CreatorCon** (Delhi), mentoring developers on ServiceNow AI Agents.

Associate Data Engineer — ServiceNow

Aug 2022 – Feb 2024 | Hyderabad, India

- Improved a Matillion workflow by **90%** via architecture redesign.
- Collaborated with Snowflake product team to enhance its ServiceNow Connector.
- Designed ETL to implement **SCD Type 2 from snapshot tables**.
- Contributed to ServiceNow's SAP HANA to Snowflake migration.
- Developed **Matillion pipelines for paginated APIs** ingestion with schema flexibility.

Software Engineer — TEKsystems Global Services

Oct 2020 – Jul 2022 | Hyderabad, India

- Conducted Snowflake training on **Time Travel, UDFs, SPs, and Snowpipe**.
- Resolved over **20+ production issues** in Matillion ETL jobs.
- Built schema-aware ETL framework from Salesforce to Snowflake for consistent ingestion.

Projects

Airbnb Analytics Pipeline — dbt + Snowflake

- End-to-end analytics pipeline on **Snowflake** built with **dbt**, applying a **medallion (Bronze → Silver → Gold)** architecture over data sourced from **Azure Blob Storage**.

Technical Skills

Tools & Technologies: Snowflake, dbt, Matillion, Git, Postman, Azure, Confluent Kafka, ServiceNow Application Development

Programming Languages & Frameworks: Python, SQL, Streamlit, Docker, Snowpark, Snowpipe, Apache Airflow

Education

B.Tech in Computer Science – GLA University, Mathura (2016–2020) – 80.9%

Certifications and Achievements

- Apache Airflow 3 Fundamentals Certified
